

Landfill Gas Flare Training 101

Landfill Flare & Wellfield Technicians, Supervisors & Engineers

Join us for a 3-day training course, June 1-3 at our manufacturing facility in Findlay, Ohio for a comprehensive course on Flare Operation & Maintenance. The training will have a heavy emphasis on electrical and controls and include classroom and hands-on training.

Course Content

Classroom discussion to include:

- Gas collection & flare operation
- Wellheads, orifice plates
- Control panels, PLCs, interface screens, shutdowns
- Flare installation, rigging
- Equipment utilization in beneficial use projects

Hands-on Training to include:

- Flare Operation & Maintenance
- Motor Control Centers & Variable Frequency Drives
- Chart Recorders, Flow Meters & Autodialers
- Control Panels & PLCs

Participants will also have the opportunity to:

- Learn troubleshooting hints & tips
- Tour the manufacturing facility
- Discuss specific issues with one of our experts

Course Details

- Monday, June 1st – training begins at 1:00 pm
- Wednesday, June 3rd – training ends at 12:00 pm
- Lunch provided Tuesday
- Dinner provided Monday and Tuesday (pool party Monday)
